

AN ENHANCED
ENGINEERING
SOLUTION.

THINK BRIGGS.

Leading Asset Management
Trusted Service Partner

Your Unique Solution; Think Briggs.

BRIGGS[®]
EQUIPMENT UK

At Briggs, we have the experience to provide a complete engineering solution for your business. From plant and agricultural, to ground care support and modified assets, Briggs is your trusted service partner.

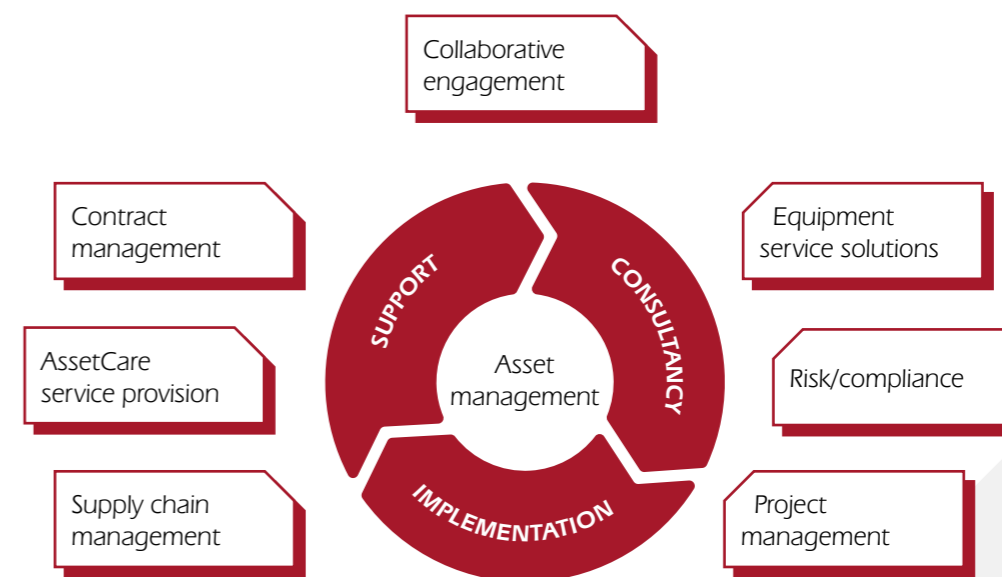

Driven by strong values, our parent, Sammons Enterprises Inc., is one of the largest privately owned companies in the world.

This provides Briggs with unique financial stability and flexibility. What's more, Briggs people are passionate about your business and dedicated to giving you market leading service and support across all sectors of industry.

With over 1,200 employees, Briggs manages its national service and commercial operations from its Staffordshire headquarters with 10 support facilities and 600 mobile engineers across the country.

We are proud to provide commercial, engineering services, project, risk, supply chain and contract management.

Managing your assets

At Briggs we pride ourselves on our engineering excellence, offering operational supply, support and maintenance on a diverse range of equipment.

Our aim is to add value to your business through a tailored asset management service. Enhancing your operations through cost reduction, improved safety, damage reduction and increased productivity.

With over 600 mobile engineers nationwide, we have an engineer local to you.

Service and maintenance options

ASSETCARE

A 'pay as you go' fixed service agreement plan that you can change at any point, without incurring extra cost.

ASSETCARE 2000

Preventative maintenance divided into 12 equal monthly payments, to help eliminate fluctuations in invoicing.

ASSETMULTIFLEX

Servicing fees are reviewed and recalculated at regular three month intervals in scheduled open book review meetings.

ASSET – ALL IN MAINTENANCE (AIM)

Briggs has full responsibility of scheduling and planning your servicing schedule and repairs for each piece of equipment at a set monthly rate.

Flexible range of contract options

Whether you're looking to buy new or used equipment, need short or long term hire or simply want to find a partner who will become a trusted part of your operations; Think Briggs.

SHORT TERM HIRE

Ideal for seasonal peaks or occasional demand, hire from one day up to 12 months. We have over 5,000 assets to choose from and we offer delivery within 24 hours.

FLEXIHIRE

Lease your asset for five years with a contract term of 12 months. If you decide your asset is surplus to requirements, we'll take it back after 12 months.

LONG TERM RENTAL

Lease your asset over a three to seven year period and benefit from full repair and maintenance.

OUTRIGHT PURCHASE

If you purchase outright, we can support you through a service and maintenance plan.

QUALITY USED EQUIPMENT

Extensive used equipment fleet available, enabling you to choose how reconditioned you want your machine.

In-house Finance

BE Finance from Briggs offers contracts tailored to customers' specific capital requirements and cash flow. There are no fees, no banks and no third parties, you deal directly with us.

Briggs is different for one very important reason. We are not a manufacturer, we are a solution provider. This means we place customers at the heart of our business, working together in a refreshing and innovative approach.

Whether servicing a single piece of equipment or managing hundreds of machines across multiple sites, Briggs has the expertise to offer an unrivalled engineering service on a national basis.

Our diverse customer portfolio includes

- Carillion
- NHS
- Interserve
- BT Fleet
- Landmarc
- Mitie
- HM Prison Service
- SSE
- ARI
- Scotia Gas Networks
- Elliott
- Hitachi

We guarantee to have an engineer on site within three hours. Adopting a first time fix philosophy, we have local teams and service vans stocked with parts.

Think Briggs for

- Three hour guaranteed engineer response (VOR)
- All equipment and all makes and models
- LOLER inspection and Health and Safety compliance
- 24/7 emergency call out service
- 90-day repair guarantee
- Overnight 'in boot' deliveries of parts to all engineers nationwide
- 600 highly trained engineers providing national coverage

We support 55,000 assets nationally, across a diverse customer group.

A unique market offering

We provide a broad range of solutions including the provision of equipment and tailored maintenance.

PLANT & AGRICULTURAL ASSETS

- Mini-diggers
- Trailers
- Air compressors
- Water pumps
- 2/4WD tractors
- Reed cutters
- Dock levellers
- Power take offs
- Tracked barrows
- Dozers
- Winches
- Skid steer loaders
- Road rollers trailers
- 4WD quads
- Roller shutter doors
- Welfare units
- Concrete mixers
- Wheeled dumpers
- Loading shovels
- Mobile generators
- On-board power units
- Mounted flails
- Pedestrian roller
- Adjustable pallet racking
- Fixed generators
- Lighting towers
- 180/360 excavators
- Water/fuel bowers
- Road graders
- Tele handlers
- Industrial mowers
- Access equipment
- Skip loaders
- Electric vehicles (golf buggies/milk floats)

GROUND CARE ASSETS

- Aerators
- Chainsaws
- Wood chippers
- Leaf blowers
- Trailers
- Small tractors
- Golf buggies mowers
- Hydraulic attachments
- Rollers
- Flails

MODIFIED ASSETS

- Telematics
- Mounted cranes
- Ancillary equipment
- Traffic light systems

GROUND SUPPORT EQUIPMENT

- Aircraft tow tractors
- Passenger steps
- Water and waste trucks
- Belt loaders
- Air conditioners
- Maintenance trucks
- Ground power units
- Baggage tractors
- Transporters
- Air starters
- Trailer and dollies
- Loaders

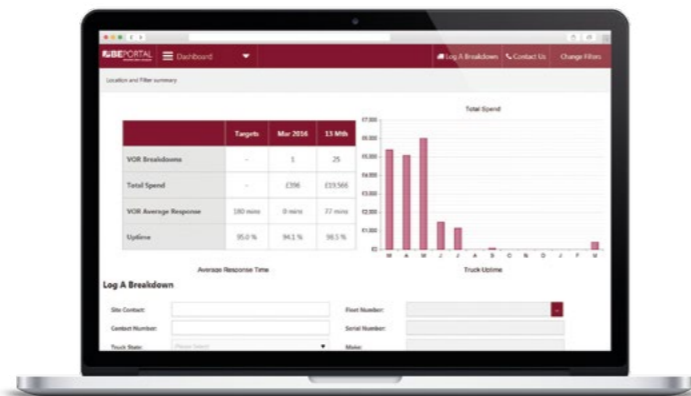

Online asset management

Briggs provides transparent asset management through BE Portal, an interactive, web-based business tool that aids decision-making.

Daily updates to the fleet listing; make, model, serial number, latest hours, contract information and job history/status, make it easy to examine truck uptime, spend on specific jobs or trucks, average breakdown response time and other critical operating information.

- Dynamic query-based reporting by group, site and even machine level
- Clear dashboards to monitor asset performance against service level agreements
- Improved breakdown management, logging and tracking of service requests
- Ability to submit meter readings and monitor machine usage, avoiding excess hours through fleet rotation
- Maintenance scheduling and monitoring
- Ability to identify trends and make informed decisions
- Total transparency of fleet for effective management 24/7
- Secure web based access, no telemetry device required
- Document management and control – central resource of Safety, Health, Environment and Quality (SHEQ) documents

- Health and safety compliance – full machine history, service records and legal LOLER documentation
- Log a breakdown, book a preventative maintenance service, track a job, change a machine location and amend a meter reading

Compliance, risk and sustainability

We are here to help keep your operators and equipment legal and safe. Our comprehensive health and safety process is regularly audited to ensure we are fully compliant

with all aspects of the law. As part of your service plan we can also arrange Thorough Examination testing and an auditable reporting and paper trail for compliance.

Quality management systems

The ISO 9001 Quality Management System provides the framework for establishing and reviewing quality and business objectives. We have an ongoing investment in the training of our own employees and are also committed to helping customers identify areas of continuous improvement. We audit all our internal activities and processes and only use the UKAS approved accreditation body.

OUR ACCREDITATIONS INCLUDE:

- ISO 14001
- ISO 9001
- Safe contractor
- CHAS
- Achilles
- Greenlight
- FPAL

By routinely interrogating data generated by BE Portal, Briggs helps customers achieve business goals by making recommendations and developing action plans that will reduce issues, improve equipment uptime and save money.

Supporting the supply chain

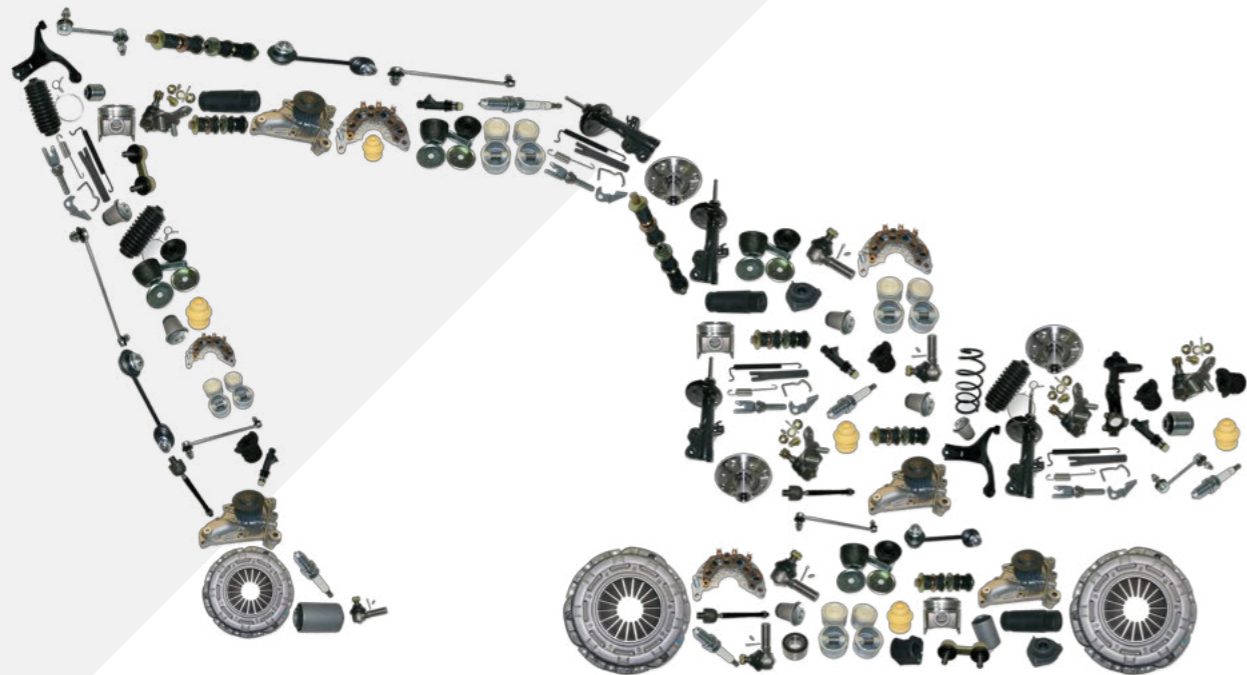

Briggs works with over 800 suppliers to maintain service levels, first time fix rates and customer satisfaction. Our in-boot supply chain delivering direct to operating sites means parts ordered before 4pm are in engineers' vans before 7am.

Through our relationships we can deliver

- Maximised first fill on parts orders
- Real time stock availability
- Live backorder management

Our supply chain partners include
