BRIGGS.

Keeping business moving

BRIGGS
EQUIPMENT

At Briggs, we have the expertise and experience to provide a complete engineering solution for your business. From materials handling equipment, to plant equipment, agricultural and a wide range of specialist vehicles; Briggs is your trusted servicing partner.

We understand that committing to a service contract is financially binding and can put a strain on you and your business, especially during tough economical climates. That's why our service agreements are flexible; we tailor your service intervals around your machine usage.

- A** **MINOR SERVICE** - Check & adjust both brake and steering operation, measure chain and fork wear, check all fluid levels, lubricate all chains channels and grease points. Check electric motors, control panel, traction battery & finally carry out a safety functionality check to ensure safe operation. All works will be recorded on a detailed inspection report which complies with The Provision and Use of Work Equipment Regulations (PUWER 98) and Briggs will submit an estimate prior to carrying out any repairs that are considered necessary unless authorised to proceed at time of service.
- B** **INTERIM SERVICE** - All of the above, including engine oil and filter, fuel filter, and air filter replacement. Spark plugs will be replaced where applicable.
- C** **MAJOR SERVICE** - All of the above, including transmission oil (up to 10 litres) and filter replacement.
